Job Summary

The successful candidate is expected to teach a minimum of two courses each semester in addition to supervising and coordinating activities in the teaching labs. Anticipated start date is August 2016.

Founded in 1953 in the Franklin College of Arts and Sciences at the University of Georgia, the Department of Microbiology has enjoyed sustained growth and has developed an international reputation in prokaryotic biology. We have approximately 40 faculty affiliates who lead vigorous and innovative research program in a wide variety of areas of microbiology.

Our research mission is to expand our knowledge of the physiology, genetics, and ecology of microorganisms. We maintain internationally recognized research programs in microbial physiology and genetics, cell biology, bacterial pathogenesis, microbial ecology and evolution, protein biochemistry, biotechnology and bioinformatics. Our teaching mission is to prepare our students for their chosen professions by fostering independent learning, critical thinking, imagination and curiosity. Rigorous coursework and original research are incorporated into the graduate and undergraduate curricula, and help prepare our students for careers in health-related professions, academia, biotechnology, industry, government, and other job sectors.

Georgia is well known for its quality of life in regard to both outdoor and urban activities (exploregeorgia.org). UGA is a land and sea grant institution located in Athens, 90 miles northeast of Atlanta (www.visitathensga.com; www.uga.edu).

The Department of Microbiology is committed to increasing the diversity of faculty and students and sustaining a work and learning environment that is inclusive. The University of Georgia is an Equal Opportunity/Affirmative Action employer. All qualified applicants will receive consideration for
employment without regard to race, color, religion, sex, national origin, disability, gender identity, sexual orientation or protected veteran status.

Minimum Qualifications

Applicants must have a Ph.D. or equivalent degree in Microbiology or related discipline and a minimum of one year prior teaching experience at the time of the start date for the appointment.
