The University of Georgia Department of Biochemistry & Molecular Biology (http://www.bmb.uga.edu/) in the Franklin College of Arts and Sciences invites applicants to apply for a Tenure-Track Assistant Professor position in the general area of Metabolomics. More senior applicants may also be considered.

With 34 tenure-track research-active faculty, the BMB department at UGA is highly diverse in terms of research focus and serves as the home department for the majority of faculty in the Complex Carbohydrate Research Center and the new Center for Molecular Medicine. This hire is aimed at building on existing capabilities in metabolomics and mass spectrometry, as well as complementing strengths in bioinformatics and systems, analytical, and structural biology within the department. Candidates must have demonstrated excellence in original research and have an earned doctorate and/or post-doctoral experience in a relevant field, such as metabolic biochemistry, analytical chemistry, or biophysics. The successful candidates could be interested in biomedical, biofuel, animal, microbial, extremophile, or plant biology with expertise in the application of metabolomics approaches to address significant biological problems. We are especially interested in candidates who specialize in mass spectrometry and who are interested in collaborating with others working in NMR and bioinformatics. Faculty duties include conducting original scholarly research, procuring supportive independent funding, teaching at the undergraduate and graduate levels, mentoring undergraduate and Ph.D. students from the Integrated Life Science program, and service to the University and to the professional field.

The University of Georgia is a research-intensive land-grant university located in Athens-Clarke County with outstanding research facilities in mass spectrometry and NMR and major new efforts in informatics. Athens lies in the northern Piedmont region of Georgia about an hour drive from Atlanta and its spectrum of cultural and mercantile resources, less than 2 hours from the Chattahoochee National Forest and southern Appalachian mountains, and within easy driving distance of the Atlantic coast. Athens is home to a thriving arts and music community and prides itself on its classical history and cultural diversity (http://www.visitathensga.com).

Interested candidates should submit application materials to https://facultyjobs.uga.edu/. Each application should include: cover letter; curriculum vitae; a strategic statement of research interests; and a statement of teaching interests. Applicants should arrange for the submission of a minimum of 3 letters of reference to bcmbjobpost@uga.edu. Questions may be directed to the Chair of the Search Committee, Dr. Lance Wells, at this e-mail address. Consideration of candidates will begin in the first week of January 2016 and continue until the position is filled.

The Franklin College of Arts and Sciences, its many units, and the University of Georgia are committed to increasing the diversity of its faculty and students, and sustaining a work and learning environment that is inclusive. Women, minorities, and people with disabilities are encouraged to apply. The University is an EEO/AA/M/F/Vet/Disability Employer.
