The Department of Mathematics at the University of Georgia seeks highly qualified candidates to fill eleven Limited Term Assistant Professor positions beginning in August 14, 2015. These positions are similar to a postdoctoral position in that they are not tenure track and involve both teaching and research. Each position is of two years duration, with the possibility of renewal for a third year. Teaching duties are the equivalent of 4 three-hour courses per year and will be aligned with the department’s new small class initiative at the pre-calculus and calculus level. In addition, Limited Term Assistant Professors are expected to participate in the research life of the Department, including the pursuit of an original research program. Applicants must exhibit potential for significant research and high quality teaching. A Ph.D., or equivalent foreign degree, in Mathematics or a closely related field is required. Applicants are encouraged to identify a member of the current faculty with whom their research aligns. Complete applications (including letters of recommendation) must be received by December 15, 2015 to ensure full consideration.

To apply, please submit a vita with a list of publications, a teaching statement, and a research statement through mathjobs.org. In addition, four letters of recommendation (one addressing the candidate's teaching skills) should be received. In addition to the mathjobs application, the University of Georgia requires all applicants to register through the University of Georgia employment portal https://facultyjobs.uga.edu/. These specific positions are identified by the quicklinks http://facultyjobs.uga.edu/postings/426.

Submission of the letters of recommendation through mathjobs.org is preferred; however, if necessary they may be sent by ordinary mail to:
